Awesome AI for Europe

> *A curated list of resources for building AI systems in Europe and Switzerland — infrastructure, models, datasets, compliance tooling, funding, and community.*

At a glance

Section	Focus	Count
Inference Providers	EU-hosted APIs, sovereign clouds, and managed model access	14
Datasets (GDPR-Safe)	Licensed corpora, speech, and legal data	14
EU AI Act Tooling	Risk classification, documentation, audit, and assessment	12
Grants & Compute	Funding programs and European supercomputing access	23
Models	Open models and model families for European languages	48
Multilingual Resources	Language-tech projects and Europe-wide corpora	2
Research Labs & Institutes	Academic and applied AI research hubs	31
Communities & Events	Ecosystem groups, conferences, and media	27

Featured Picks

Pick	Section	Why it stands out
Infomaniak LLM API	Inference Providers	Swiss privacy-first managed inference with a free tier and eco-certified Geneva hosting.
ETH AI Center	Research Labs & Institutes	Switzerland's flagship AI research hub with strong trustworthy-AI credentials.
JUPITER (FZJ)	Grants & Compute	Europe's first exascale system, designed for large-scale AI training and research.
Occiglot	Models	Pan-European foundation-model initiative for all 24 official EU languages.
SwissDial	Datasets (GDPR-Safe)	High-value Swiss German dialect dataset for speech and text research.
Swiss AI Association	Communities & Events	Switzerland's primary AI ecosystem body for research, business, and policy.

The section lists below keep each entry to one line, with tags and licensing notes to make trust, openness, and geography easy to scan at a glance.

Browse by Geography

Region	What to look for
Switzerland	Sovereign inference, Swiss-language resources, applied AI hubs, and research bodies
Nordics	Nordic language models, regional corpora, and strong public compute programs
DACH	German-language models, enterprise inference, and AI Act tooling
Western Europe	Major labs, enterprise AI services, and large multilingual projects
Southern Europe	Catalan, Spanish, Italian, Portuguese, and Greek resources
Central & Eastern Europe	Slavic, Baltic, and Balkan models, labs, and communities
Pan-European	EU-wide datasets, compute, funding, and foundational models

- Research Labs & Institutes
- Communities & Events

Inference Providers

EU-based or EU-compliant LLM inference hosts.

- Mistral AI — French AI company offering frontier LLMs with EU-hosted API endpoints. `[EU-hosted]` `[Open weights]`
- Aleph Alpha — German AI company providing sovereign, GDPR-compliant LLM inference and enterprise AI solutions. `[EU-hosted]` `[GDPR-DPA]`
- OVHcloud AI Endpoints — Managed AI inference on EU-sovereign OVHcloud infrastructure with open-source models. `[EU-hosted]` `[GDPR-DPA]`
- Scaleway Generative APIs — French cloud provider offering managed LLM inference from EU data centers. `[EU-hosted]` `[GDPR-DPA]`
- Deutsche Telekom Industrial AI Cloud — German sovereign AI cloud (T-Systems) for training and running models within Germany and EU regulations. `[EU-hosted]` `[GDPR-DPA]`

- IONOS AI Model Hub — German cloud provider offering LLM inference from EU-sovereign data centers. `[EU-hosted]` `[GDPR-DPA]`
- Nebius AI — Amsterdam-headquartered AI cloud offering GPU clusters and LLM API with EU data-residency and zero-retention inference options. `[EU-hosted]` `[GDPR-DPA]` `[Free tier]`
- Gcore Inference — Luxembourg-based edge and cloud AI inference platform with sovereign EU infrastructure and 200+ Tbps network. `[EU-hosted]`
- Infomaniak LLM API — Swiss privacy-first managed LLM inference with eco-certified Geneva hosting and a free tier. `[EU-hosted]` `[GDPR-DPA]` `[Free tier]`
- Exoscale GPU Compute — Swiss cloud provider offering A100/H100 GPU instances for model serving and AI workloads. `[EU-hosted]` `[GDPR-DPA]`
- DeepL API — German translation AI platform with a widely used API for multilingual products and workflows. `[EU-hosted]` `[GDPR-DPA]`
- Swisscom AI Services — Swiss-sovereign managed AI infrastructure and model services from Switzerland's largest telco. `[EU-hosted]` `[GDPR-DPA]`
- Alpine AI (SwissGPT) — Swiss-hosted enterprise LLM access platform with strong privacy positioning and multilingual support. `[EU-hosted]` `[GDPR-DPA]`
- LightOn — French enterprise AI company offering managed LLM products and EU-hosted infrastructure. `[EU-hosted]`

Datasets (GDPR-Safe)

Datasets with clear EU-compatible licensing for training and evaluation.

- mC4 — Multilingual colossal cleaned Common Crawl corpus covering 101 languages. `ODC-BY-1.0`
- OPUS Corpora — Collection of freely available parallel corpora for machine translation across European languages. `Various open licenses`
- EuroParl — Parallel corpus extracted from European Parliament proceedings in 21 EU languages. `Free for research`
- OSCAR — Open Super-large Crawled Aggregated corpus with per-language subsets and metadata. `CC0-1.0`
- Common Crawl (filtered) — Web crawl data with language-specific and quality-filtered subsets available. `CC-BY-4.0` / `Public domain`
- Multilingual LibriSpeech (MLS) — Large-scale multilingual speech corpus derived from LibriVox audiobooks in 8 European languages. `CC-BY-4.0`
- EUR-Lex — Official EU law and legal documents across all EU languages, useful for legal NLP. `Public domain (EU reuse policy)`
- FineWeb — 15-trillion-token English web dataset from Hugging Face, heavily filtered and deduplicated from Common Crawl. `ODC-BY-1.0`
- FineWeb-2 — Multilingual follow-up to FineWeb covering 1,000 languages (~3T words), cleaned and quality-filtered. `ODC-BY-1.0`
- SwissDial — Speech and text dataset for regional Swiss German dialects (Alemannic). `MIT`
- Common Voice — Crowdsourced voice dataset covering 50+ European languages including minority languages. `CC0`
- Europeana Data — Access to millions of digitized cultural heritage items from European institutions, useful for retrieval and multimodal research. `Mixed`
- Portuguese Corpus (AC/DC) — Large Portuguese text corpus for NLP research. `Academic`
- Nordic Dialect Corpus — Collection of Nordic dialect recordings and transcriptions. `Academic`

EU AI Act Tooling

Tools that help with EU AI Act compliance workflows. This section lists resources for understanding and preparing for EU AI Act requirements — it does not constitute legal advice (verify current enforcement schedule before acting).

Risk Classification

- AI Act Explorer — Interactive tool for browsing and understanding the EU AI Act text, risk categories, and obligations. `[Free]`
- ai-act-checklist — Open-source checklist tool for mapping AI systems to EU AI Act risk categories. `[Open-source]`

Documentation / Model Cards

- Model Card Toolkit — Google's toolkit for generating model cards that help meet AI Act transparency requirements. `[Open-source]` `Apache 2.0`
- Hugging Face Model Cards — Standardized model documentation format widely adopted across the EU open-source AI ecosystem. `[Free]`

Monitoring / Audit

- COMPL-AI — ETH Zurich benchmark framework for evaluating LLM compliance with the EU AI Act. `[Open-source]` `[Academic]`
- LNE AI Act Checklist — French national metrology lab checklist for mapping systems to EU AI Act risk categories. `[Free]`
- Z-Examen — German research project developing a standardized testing and certification procedure for AI system quality and safety. `[Open-source]`
- Saidot — Finnish AI governance and transparency platform for managing risks and documentation. `[Proprietary]`
- Enzai — Northern Ireland-based AI governance platform for compliance and regulatory risk management. `[Proprietary]`
- Holistic AI — AI governance, risk, and compliance platform focused on auditing and transparency. `[Proprietary]`

Conformity Assessment Prep

- FRIA Templates — Fundamental Rights Impact Assessment templates for high-risk AI systems under the EU AI Act. `[Open-source]`
- ALTAI Self-Assessment — Assessment List for Trustworthy AI from the EU High-Level Expert Group, a tool for self-assessing AI trustworthiness. `[Free]`

Grants & Compute

Funding and compute programs available to EU-based developers and researchers.

EU Grants

- Horizon Europe AI Calls — EU framework programme funding for AI research and innovation projects across Europe (verify current enforcement schedule before acting). `[EU-funded]`
- Digital Europe Programme — EU funding programme for deploying AI, cybersecurity, and advanced digital skills capacities. `[EU-funded]`

National Programs

- France 2030 — AI National Strategy — French national programme funding AI research labs, compute infrastructure, and startups. `[National]`

- German BMWK AI Programs — German Federal Ministry for Economic Affairs funding for applied AI projects and SMEs. `[National]`
- NL AIC — Netherlands AI Coalition — Dutch public-private partnership coordinating national AI funding and strategy. `[National]`
- Innosuisse AI Funding — Swiss federal innovation funding for AI startups, applied research, and industry partnerships. `[National]`

Free Compute

- EuroHPC JU — Joint Undertaking providing access to European pre-exascale and petascale supercomputers for AI research. `[EU-funded]` `[Free for researchers]`
- CINECA — Italian interuniversity computing center offering HPC resources including the Leonardo supercomputer. `[Academic]`
- LUMI Supercomputer — One of Europe's fastest supercomputers in Finland, open to EU researchers for large-scale AI workloads. `[EU-funded]` `[Academic]`
- Meluxina (LuxProvide) — Luxembourg EuroHPC-class supercomputer offering AI research compute for European researchers. `[EU-funded]` `[Free for researchers]`
- MareNostrum 5 (BSC) — Barcelona supercomputer with a dedicated AI accelerator partition for EU research workloads. `[EU-funded]` `[Academic]`
- JUPITER (FZJ) — Europe's first exascale supercomputer, designed for foundation-model training and large-scale AI research. `[EU-funded]` `[Academic]`

Accelerators

- ELLIS PhD Program — Pan-European network offering funded PhD positions in machine learning and AI across top labs. `[Academic]`
- EIT Digital Accelerator — EU-backed accelerator supporting AI and deep-tech startups with market access and funding. `[EU-funded]`

Research Funding

- SNSF BRIDGE — Swiss programme helping research projects transition into innovation and commercialization. `[National]`
- FNR (Luxembourg National Research Fund) — Luxembourg's main public research funder, including AI- and data-related calls. `[National]`
- FFG — Austrian Research Promotion Agency — Austrian national funding agency for R&D projects including AI. `[National]`
- Innovation Fund Serbia — Serbian innovation funding agency. `[National]`
- HRZZ — Croatian Science Foundation — Croatian national science funding body. `[National]`
- NKFIH — Hungarian National Research, Development and Innovation Office — Hungarian national funding body for research and innovation. `[National]`
- FCT — Foundation for Science and Technology — Principal national research funding agency in Portugal. `[National]`
- LMT — Research Council of Lithuania — Lithuanian national research funding agency. `[National]`
- LZP — Latvian Council of Science — Latvian national science funding body. `[National]`

Models

Open model releases and model families useful for researchers and builders in Europe.

Swiss & Alpine

- SwissBERT — Multilingual BERT model for Switzerland, trained on Swiss news articles in four languages. `[Open weights]` `MIT`

- Meditron (EPFL) — Open medical LLM suite adapted from Llama 2 by EPFL for clinical and biomedical use cases. `[Open weights]` `Llama 2 Community License`

Germanic (DE, NL, SV, DA, NO, IS, FO)

- German BERT — BERT model pre-trained on German text by the Bavarian State Library. `[Open weights]` `MIT`
- RobBERT — Dutch RoBERTa model trained on the OSCAR Dutch corpus. `[Open weights]` `MIT`
- KB-BERT — Swedish BERT model pre-trained by the National Library of Sweden. `[Open weights]` `CC-BY-4.0`
- LeoLM — German-optimised LLMs fine-tuned from Llama 2 and Mistral by Hessian AI and LAION, available in multiple sizes. `[Open weights]` `Apache 2.0`
- Danish BERT — Danish BERT model trained on the Danish Gigaword corpus. `[Open weights]` `CC-BY-4.0`
- ScandiBERT — North Germanic language model covering Danish, Norwegian, Swedish, Icelandic, and Faroese. `[Open weights]` `Apache 2.0`
- GPT-SW3 — Large-scale generative LLM for Nordic languages developed by AI Sweden. `[Open weights]` `Apache 2.0`
- Poro — Multilingual LLM for Finnish and English developed through the LumiOpen collaboration. `[Open weights]` `Apache 2.0`
- NorLM — Large language models for Norwegian Bokmål and Nynorsk from the University of Oslo. `[Open weights]` `CC-BY-SA-4.0`

Romance (FR, ES, IT, PT, RO, CA)

- CamemBERT — French language model based on RoBERTa, trained on French subcorpus of OSCAR. `[Open weights]` `MIT`
- FlauBERT — French BERT model trained on a diverse French corpus. `[Open weights]` `MIT`
- Projecte AINA / MATCHA — High-performance Catalan LLM from the Barcelona Supercomputing Center. `[Open weights]` `Apache 2.0`
- MarIA — Massive Spanish language model from Spain's National Library and PlanTL. `[Open weights]` `Apache 2.0`
- BERTinho — High-quality Portuguese BERT model used as a strong baseline for PT NLP. `[Open weights]` `Apache 2.0`
- CroissantLLM — Truly bilingual French-English LLM with balanced pretraining and open weights. `[Open weights]`
- UmBERTo — Italian RoBERTa-based model trained on a large-scale web corpus. `[Open weights]` `Apache 2.0`
- Romanian BERT — BERT model pre-trained on a large Romanian corpus. `[Open weights]` `MIT`
- TowerLLM — Translation-specialized LLM for Portuguese, English, German, French, and more. `[Open weights]` `CC-BY-NC-4.0`

Slavic (PL, CS, SK, SL, HR, BG)

- Polish RoBERTa — RoBERTa model trained on a large Polish corpus. `[Open weights]`
- Bielik — Polish language model based on the Mistral architecture from SpeakLeash. `[Open weights]` `Apache 2.0`
- RobeCzech — Monolingual Czech RoBERTa model developed by Charles University. `[Open weights]` `CC-BY-NC-SA-4.0`
- SlovakBERT — Specialized RoBERTa-based model for the Slovak language. `[Open weights]` `Apache 2.0`
- SloBERTa — Slovenian language model trained by the EMBEDDIA project. `[Open weights]` `MIT`

- BCMS-BERT — BERT model for Serbian and related South Slavic languages. `[Open weights]` `Apache 2.0`

Uralic & Baltic (FI, ET, HU, LV, LT)

- FinBERT — Finnish BERT model from the TurkuNLP group. `[Open weights]` `Apache 2.0`
- EstBERT — Monolingual BERT model for Estonian by University of Tartu researchers. `[Open weights]` `Apache 2.0`
- Latvian BERT — BERT model pre-trained on Latvian web and news corpora. `[Open weights]` `Apache 2.0`
- Lithuanian BERT — BERT model for Lithuanian language. `[Open weights]` `Apache 2.0`

Smaller & Minority Languages

- IceBERT — RoBERTa-based language model for Icelandic, developed by Miðeind. `[Open weights]` `Apache 2.0`
- LuxBERT — Monolingual BERT model for Luxembourgish. `[Open weights]` `MIT`
- Maltese BERT — BERT model specifically pre-trained on Maltese language text. `[Open weights]` `Apache 2.0`
- Faroese BERT — RoBERTa-based model trained on Faroese language data. `[Open weights]` `MIT`
- Welsh BERT (Techiaith) — RoBERTa model for Welsh developed by the Techiaith team at Bangor University. `[Open weights]` `Apache 2.0`

Hellenic & Other

- Greek BERT — BERT model specifically for Modern Greek by AUEB NLP Group. `[Open weights]` `Apache 2.0`
- CeltBERT — BERT models for Celtic languages including Breton, Irish, Welsh, Manx, and Scottish Gaelic. `[Open weights]` `MIT` / `Apache 2.0`
- Basque BERT — High-quality transformer model for the Basque language (Euskara). `[Open weights]` `Apache 2.0`
- Basque (Euskara) MT Models — Machine translation models for Basque language. `[Open weights]` `Apache 2.0`

Multilingual / Cross-lingual

- mBERT — Google's multilingual BERT covering 104 languages. `[Open weights]` `Apache 2.0`
- XLM-R — Meta's cross-lingual language model trained on 100 languages. `[Open weights]` `MIT`
- LaBSE — Multilingual sentence embedding model that maps 109 languages into a shared vector space for cross-lingual search and retrieval. `[Open weights]` `Apache 2.0`
- Helsinki-NLP / OPUS-MT — Over 1,000 open neural machine translation models for European language pairs. `[Open weights]` `Apache 2.0`
- EuroLLM — Multilingual LLM initiative focused on European languages as part of the UTTER project. `[Open weights]`
- EuroBERT — Multilingual encoder for 15 European languages, positioned as a stronger alternative to XLM-R. `[Open weights]` `Apache 2.0`
- Occiglot — Pan-European initiative building open foundation models for all 24 official EU languages. `[Open weights]` `Apache 2.0`

Multilingual Resources

Resources for non-English European languages. Dedicated model releases now live in the Models section.

Language Technology Projects

- HPLT (High Performance Language Technologies) — Major EU-funded initiative providing multilingual datasets and model resources across 75+ languages. `[EU-funded]`
- Swiss-AL Corpus — Large multilingual corpus covering Switzerland's national languages: German, French, Italian, and Romansh. `[Academic]`

Research Labs & Institutes

EU-based AI research labs and institutes.

- SDSC (Swiss Data Science Center) — Switzerland. Joint ETH Zurich–EPFL initiative accelerating data science and AI adoption across research and industry. `[Academic]`
- INRIA — France. National research institute for digital science and technology, with major AI research teams. `[Academic]`
- DFKI — Germany. German Research Center for Artificial Intelligence, one of the world's largest AI research centers. `[Academic]`
- CWI — Netherlands. National research institute for mathematics and computer science, with an ML research group. `[Academic]`
- Alan Turing Institute — United Kingdom. National institute for data science and AI, named after Alan Turing. `[Academic]`
- Max Planck Institute for Intelligent Systems — Germany. Leading research on perception, learning, and intelligent systems. `[Academic]`
- ELLIS Institutes — Pan-European. Network of AI research labs across Europe focused on machine learning excellence. `[Academic]`
- CLAIRE — Pan-European. Confederation of Laboratories for AI Research in Europe, connecting 400+ labs. `[Academic]`
- LAION — Germany. Non-profit providing open-source large-scale datasets and models for AI research. `[Open-source]` `[Academic]`
- Barcelona Supercomputing Center (BSC) — Spain. Operates MareNostrum 5 pre-exascale supercomputer and hosts one of the EU's seven official AI factories. `[Academic]`
- Fraunhofer IAIS — Germany. Applied AI research institute near Bonn specialising in ML, NLP, and generative AI for industry. `[Academic]`
- Idiap Research Institute — Switzerland. Independent EPFL-affiliated institute researching speech, NLP, computer vision, and machine learning. `[Academic]`
- ETH AI Center — Switzerland. Central hub for AI research at ETH Zurich, with a strong focus on trustworthy AI systems. `[Academic]`
- Jožef Stefan Institute (AI Lab) — Slovenia. Leading AI and ML research lab covering knowledge technologies, data mining, and language resources. `[Academic]`
- ZHAW Centre for AI — Switzerland. Applied AI research center at ZHAW specialising in computer vision, NLP, and industry transfer. `[Academic]`
- INSAIT — Bulgaria. Flagship AI research institute for South-East Europe. `[Academic]`
- Kyutai — France. Non-profit open-science AI lab publishing open models including the Moshi real-time voice assistant. `[Academic]` `[Open-source]`
- CYENS Centre of Excellence — Cyprus. EU-funded research center for interactive media, smart systems, and AI applications. `[Academic]`
- GATE Institute — Bulgaria. Big Data for a Smart Society institute focusing on AI and data science. `[Academic]`
- LERO (The Irish Software Research Centre) — Ireland. National software research center with significant AI safety and ethics work. `[Academic]`

- AI Center of Excellence (Czechia) — Czechia. Platform connecting Czech research institutions focused on artificial intelligence. `[Academic]`
- University of Tartu (NLP Group) — Estonia. Leading research group for Estonian NLP and multilingual language models. `[Academic]`
- ETF Belgrade (University of Belgrade) — Serbia. Leading engineering faculty with established AI, machine learning, and NLP research programs. `[Academic]`
- Kaunas University of Technology (KTU) — Lithuania. Major technical university with focused AI and machine learning research in its Computer Science faculty. `[Academic]`
- FEIT Skopje (Ss. Cyril and Methodius University) — North Macedonia. Leading engineering faculty with AI and signal processing research. `[Academic]`
- University of Montenegro — Faculty of Electrical Engineering — Montenegro. Primary engineering university in Montenegro with emerging AI and signal processing work. `[Academic]`
- INESC ID — Portugal. Research institute at IST/ULisboa with strong AI, NLP, and machine learning groups. `[Academic]`
- INESC TEC — Portugal. Large applied research institute in Porto with AI, robotics, and data science groups. `[Academic]`
- Austrian Institute of Technology (AIT) — Austria. Austria's largest research institute, with AI safety, digital systems, and responsible AI focus. `[Academic]`
- TU Wien — Informatics — Austria. Austria's leading technical university with AI, knowledge representation, and computer vision research. `[Academic]`
- Eötvös Loránd University (ELTE) — Hungary. Budapest's flagship university with strong CS and AI research groups in NLP and machine learning. `[Academic]`

Communities & Events

Communities, forums, and events for EU AI builders.

Online Communities

- LAION Discord — Active community around open-source datasets and AI research, strong European contributor base.
- EleutherAI — Open-source AI research collective with global and EU-based members working on open language models.
- Hugging Face Community — Forums and Discord for the Hugging Face ecosystem, home to many EU-based researchers and builders.
- r/LocalLLaMA — Reddit community focused on running LLMs locally, with frequent EU-specific infrastructure discussions.

Conferences (EU-based)

- ICLR — International Conference on Learning Representations, frequently held in European cities.
- NeurIPS — Top ML conference with European workshops and satellite events.
- ECML-PKDD — European Conference on Machine Learning and Principles and Practice of Knowledge Discovery in Databases.
- AI4EU Summit — Annual conference of the EU-funded AI-on-Demand Platform bringing together European AI stakeholders.

Newsletters & Media

- ML Street Talk — AI research discussion channel hosted by EU-based researchers including Dr. Tim Scarfe.
- Yannic Kilcher — Swiss-based AI researcher producing in-depth ML paper reviews and discussions.
- Import AI — Weekly newsletter covering AI policy and research, with regular EU regulatory coverage.

National Associations

- Swiss AI Association — Switzerland's primary AI ecosystem body connecting researchers, businesses, and policy makers.
- Swiss NLP — Association connecting NLP researchers and practitioners across Switzerland.
- AI Estonia (AIRE) — Estonian Digital Innovation Hub for AI, supporting SMEs and industry adoption.
- Serbian AI Society — Professional AI society in Serbia promoting research and industry collaboration.
- Croatian AI Association — Croatian AI community connecting researchers and industry.
- AI Portugal — National AI association in Portugal.
- Lithuanian AI Association — National AI association in Lithuania.
- Malta AI Association — AI community in Malta.
- Cyprus AI Initiative — AI community in Cyprus.
- Slovakia.ai — Association for the development and application of artificial intelligence in Slovakia.
- Hellenic AI Society (EETN) — Greek professional association for researchers and practitioners in AI.
- AI Poland — Foundation promoting the Polish AI ecosystem through collaboration and policy.
- AI4Belgium — National community and ecosystem builder for AI adoption in Belgium.
- AI Ireland — Irish community hub promoting AI development through awards, networking, and education.
- AppliedAI Initiative — Germany's leading initiative for applied AI and ecosystem building.
- Austrian AI Association (AAIA) — Non-profit connecting the Austrian AI ecosystem.

Contributing

See CONTRIBUTING.md for guidelines on adding resources.

Scope & Disclaimer

This list curates resources for building AI systems in Europe. It is **not** a compliance checker, legal advisor, or endorsement of any product. References to the EU AI Act, GDPR, or other regulations are pointers to tools that help with those topics — they do not constitute legal advice. Always verify current enforcement schedules and consult qualified professionals before acting on regulatory information.
